Step by Step Instructions

- 1. Assemble Discharge Kit as shown on previous page. (Item 7, 90° sweep is optional depending on implement.)
- 2. Cut 2" fill line and insert the two hose barbs of the discharge kit into fill line. Tighten with hose clamps provided.
- 3. Included 3/4" and 1-1/4" plugs can be used as necessary to plug unused fill/ discharge bung on tank.
- 4. Route provided 2" hose to D160 or D250 PumpRight System. Tighten with hose clamps provided.

NOTE: Splice into the fill line where it will be convenient to close the valve while filling the tank.

Shown with 200BRB45.
